15 Strategies to Support Inclusion using SpacesEDU

SpacesEDU by myBlueprint

1. Add Video or Audio instructions to Posts and Activities for differentiated instruction

2. Encourage students to post using a variety of media-types for voice and choice in learning

3. Include exemplars from Files, Google Drive, or Microsoft OneDrive

4. Add feedback on Posts using a variety of media-types; encourage students to reflect in a similar manner
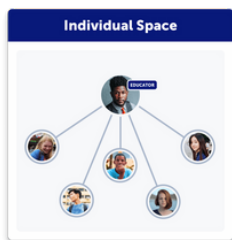

5. Share Posts or assign Activities to one, multiple, or all students

6. Post or submit an Activity on a student's behalf

7. Create and assign Individual Spaces for select students (i.e. an IEP Space)

**8.** Create an Individual Space for anecdotal notes; keep this space hidden from students and family

9. Promote a community of learning by inviting co-teachers

10. Encourage co-teachers to record independent learning sessions and post to SpacesEDU

11. Invite family to SpacesEDU; share feedback prompts for interacting with Posts

12. Add multiple tag sets to support students working at different grade-levels (modified programing)

13. Use the Proficiency Report to inform opportunities for reassessment

14. Print student QR codes for a easy access to SpacesEDU

15. Log in with a student's QR code and view their All Work Feed to see Posts from previous years

Tell us how you use SpacesEDU for inclusion, so we can share best practices with educators! Receive a $25 gift card for your time!
